SUMMARY

I've been building websites for about 4 years. I started with plain HTML, CSS and JavaScript, then moved to React and Tailwind CSS, and I use Supabase or Firebase when a project needs a backend. I've built more than 10 projects, including an online store and a history learning platform with a teacher dashboard. I'm currently available for freelance projects.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Tailwind CSS, Bootstrap, Sass, jQuery, Swiper JS, responsive layouts

Backend services: Supabase, Firebase, working with REST APIs

Tools: Git, GitHub, deploying on Vercel, Cloudflare Pages and GitHub Pages

Other: Python (studied, not used in my recent work)

EXPERIENCE

Frontend Developer Freelance

2022 – Present | Remote

- Building and publishing my own web projects since 2022, and working with freelance clients since 2026.
- Built an online electronics store with accounts, cart, coupons, order history, and order notifications sent to the owner on Telegram.
- Built a history learning platform for a teacher. Students log in and take courses with videos and files, solve quizzes, and the teacher follows their progress. The teacher has a dashboard to add and manage courses.
- Built a portfolio website for a full-stack developer.
- Handle each project from the layout to the live deployment.

SELECTED PROJECTS

Online Electronics Store HTML, Tailwind CSS, JavaScript, Supabase

[Live](#) | [Code](#)

- Full shopping flow: product browsing, sign up and login, cart, checkout, and a page with the user's past orders.
- Coupon codes that can only be used once per user.
- Every order is sent to the store owner on Telegram with all the details, so nothing gets missed.

History Learning Platform React, Tailwind CSS, Supabase, Firebase

[Live](#) | [Code](#)

- My largest project to date. A full learning platform with student accounts, organized courses, video and file uploads, quizzes, progress tracking, and a dedicated teacher dashboard for managing the platform.
- Separate teacher dashboard for adding courses and following students.

This Portfolio React, Tailwind CSS, Supabase

[Live](#) | [Code](#)

- A personal portfolio website showcasing my projects, skills, and web development experience. It includes English and Arabic versions with right-to-left layout, and a light and dark theme.

Other projects

- **Ramadan Website** (HTML, CSS, JavaScript, API): prayer times, countdown, daily adhkar, and a digital tasbih. [Live](#) | [Code](#)
- **Hospital Website** (HTML, CSS, JavaScript): responsive site with services, doctors and appointments. [Live](#) | [Code](#)
- **Product Landing Page** (HTML, CSS, Bootstrap): features, statistics and pricing plans. [Live](#) | [Code](#)
- **Swimming Coach Portfolio** (HTML, CSS, JavaScript): personal site for a swimming coach and lifeguard showing his experience, qualifications and services. [Live](#) | [Code](#)
- **Coffee Website** (HTML, CSS): a coffee shop site. [Live](#) | [Code](#)

LEARNING

Self-taught through YouTube courses: HTML, CSS and JavaScript with Elzero Web School, React with Tarmeez Academy, and Bootstrap and Tailwind CSS with Sabry Hosny. I learned Git, GitHub, Supabase and Firebase on my own and used them in real-world projects.

LANGUAGES
